Charles M. Schulz – Sonoma County Airport (STS)

Aircraft Noise
Monthly Report

April 2020
About the Charles M. Schulz – Sonoma County Airport and Noise Abatement

The Airport operates as a self-supporting Enterprise Fund within the Department of Transportation and Public Works and under the jurisdiction of the Federal Aviation Administration (FAA). STS is both a general aviation facility, serving private planes and business jets, and is a commercial airline facility with scheduled air service. STS generates over $1,300,000 annually in tax revenues, via its users, for Sonoma County and County School Districts.

The Airport’s current Noise Abatement Program was established in 1988. STS also works within FAA guidelines, to encourage pilots and airlines to fly with consideration of our neighbors in mind. The Airport makes every effort to promote flight procedures that minimize aircraft noise while always maintaining safety as the highest priority. It is the FAA’s sole responsibility to develop air traffic rules, assign the use of airspace, and control air traffic.

STS is working with our Aviation Commission and a community advisory group to re-write the Airport’s Noise Abatement Guide and associated procedures. Using flight-tracking and noise management software, the Airport also provides monthly complaint reports to airlines so that operators can use real data to update flight practices and fly friendly.

STS Historical Operations
This Month’s Operations

- 63 Noise Complaints received
- 18 Individual Complainants
- 44 Correlated Operations*
- 21 Complaints that were non-specific or unable to be correlated to a flight track/aircraft

*An Operation is a departure from or an arrival to the Airport. Complaints may be correlated to more than one Operation or may not be correlated to an Operation.
What’s Changed This Year? April 2020 vs. 2019

- **49% decrease in total operations**: 3,615 / 7,139
- **55% decrease in airline operations**: 259 / 569
- **142% increase in total complaints**: 63 / 26
- **120% increase in individual complainants**: 18 / 15

Airlines and Operators Identified Through Complaints

Alaska Airlines: 13
- 5 Turboprop

Aircraft Altitudes

There were 42 aircraft with tracked altitudes identified through complaints made in April 2020. At the point of closest approach (PCA) to the complainant’s address, altitude was recorded (in feet).

What are the altitude requirements for aircraft landing at or taking off from the Airport?

The Airport’s standard altitude pattern is the highest allowed by the FAA. Under FAA regulations, altitude restrictions are not applicable during landing and takeoff. The FAA has exclusive sovereignty of airspace in the United States (49 U.S.C. Section 40103(a)).
Originating Locations of Complaints

- Healdsburg: 1
- Penngrove: 1
- Santa Rosa: 3
- Sebastopol: 3
- Windsor: 7

This graph reflects the locations of unique complainants this month.

Why are aircraft flying over my house?

The FAA directs traffic into and out of the Airport. Flights are directed to the safest pattern depending on the amount of air traffic and prevailing winds at the time of arrival or departure. Safety is the FAA’s first consideration. However, aircraft can and do fly over all parts of Sonoma County. Sonoma County does not contain any No Fly Zones.
